Workshop for Dairy Farmers:
Water Quality Regulatory Changes

20+ YEARS OF IMPACT

CALIFORNIA DAIRY Quality Assurance PROGRAM
A Program of the California Dairy Research Foundation

The California Dairy Quality Assurance Program (CDQAP) will be hosting workshops this June on the Modesto Nitrogen Management Zone regulatory changes. Similar orders are expected to follow in other regions. The Order will make provisions of Management Zone Implementation Plans (MZIPs) enforceable (including commitment to try to reach whole-farm balance of nitrogen within 10 years).

Two workshops are being offered for dairy farmers. See the dates and details on the right.

Topics to be covered in the workshops:

- Details of the Modesto Order and why it's important
- Status of the CVDRMP Data Management Tool and Reporting Portal
- What you can do now to prepare

These California Dairy Quality Assurance Program workshops are made possible by the California Dairy Research Foundation.

The California Dairy Quality Assurance Program's (CDQAP) environmental stewardship module is a partnership of the dairy industry, educators, and government working together toward a single, shared goal: helping California dairy producers understand and comply with federal, state, and local laws and regulations. CDQAP partners include:

California Dairy Campaign • California Department of Fish and Wildlife • California Department of Food and Agriculture
California Environmental Protection Agency • California Farm Bureau Federation • California Milk Advisory Board
California Dairy Research Foundation • California Resources Agency • Milk Producers Council
State Water Resources Control Board • Sustainable Conservation • U.S. Environmental Protection Agency
U.S. Department of Agriculture, Natural Resources Conservation Service
University of California Cooperative Extension • Western United Dairies
